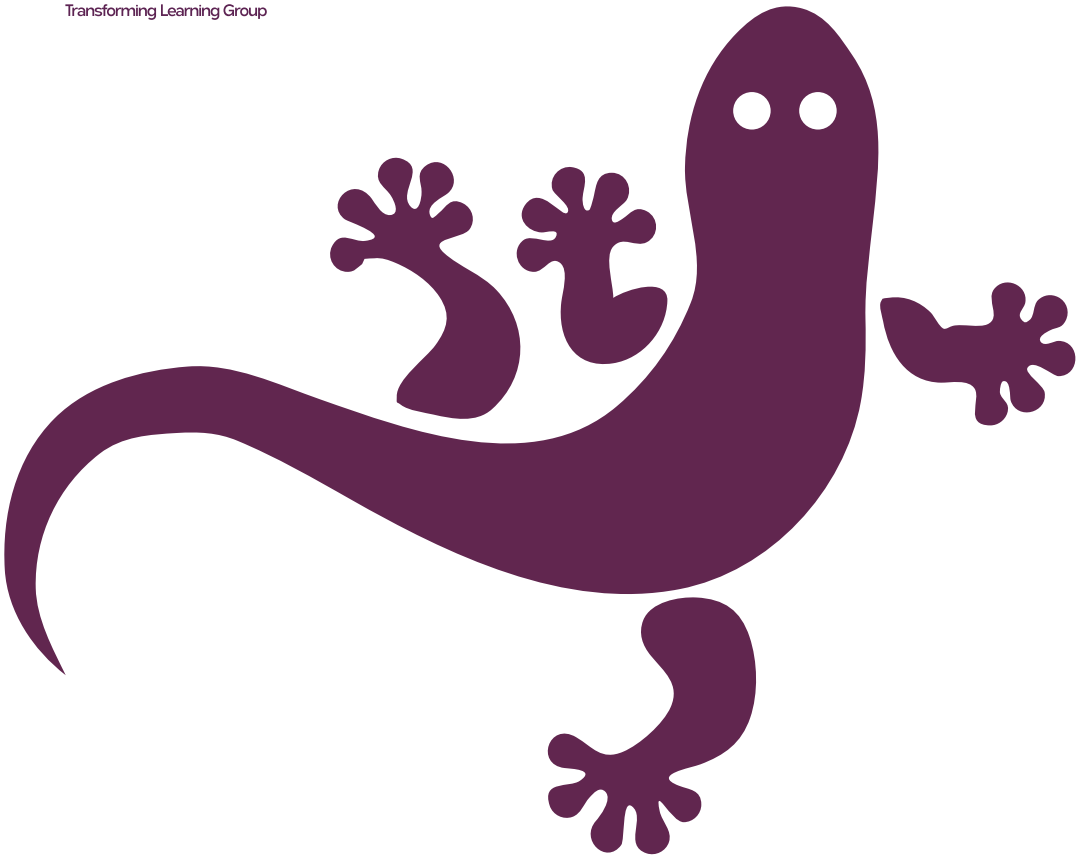
SalamanderSoft
Transforming Learning Group



User Management Solutions

Seamless Integration with Learning Tools

Trusted by over 4,000 customers

User Life Cycle Management for Single Schools and MATs

One annual license for all the Integration Suite Product features

Industry leading MIS-based provisioning in the Education Sector

Full User Account Lifecycle Management

Utilising Salamander Integration Suite, Staff and Students can have access to the tools and apps they need quickly and consistently. Driven by your MIS data, the Salamander Integration Suite ensures access to everything from learning tools such as Microsoft 365, Teams, and Google Classroom to essential communication utilities like email distribution groups and timetables and much more. And when the time comes, we will automatically process your Staff and Student 'leaver' accounts according to your data protection and safeguarding requirements.

What we offer

Automated provisioning of user accounts

Creation and management of Microsoft Teams and Google Classroom

Paxton Net2 Assign departments and access levels and disable them when people leave

Jamf Create Users, Groups and Classes

Apple School Manager Create Users and Classes

> **A completely customisable and adaptable product that grows with us, without the additional costs.**

Senior IT Technician

Increase efficiency and save time

Take away the time-consuming, manual processes when it comes to managing your systems and user accounts. The Salamander Integration Suite automatically synchronises user accounts, groups, permissions and more from your MIS. Reclaim valuable time for your IT team, enabling them to focus on IT strategy and service delivery.

Do more with your data

Salamander allows you to do more with your MIS data. For example, we can synchronise with various sources of timetable information within your MIS, such as cover timetables, exam timetables, room timetables and staff calendars and diaries. We can also add any notifications and reminders that are required.

Timetable synchronisation

	Monday 21	Tuesday 22	Wednesday 23	Thursday 24	Friday 25
08:00					
09:00	Science Science Lab 9	Physical Ed Changing Rooms	Technology Technology 1	Mathematics Maths Room 4	Music Drama Studio
10:00		Computer Science IT 1		English English Room 3	Geography Humanities Room 1
11:00					
12:00	History Humanities Room 3	Mathematics Maths Room 4	Mathematics Maths Room 4	French Language Room 2	Technology Art Room 2
13:00	Art Art Room 3	Religious Education Humanities Room 5	English English Room 3	Physical Ed Changing Rooms	English English Room 3
14:00					
15:00	French Language Room 2	English English Room 3	Science Science Lab 9	Citizenship Gym	Mathematics Maths Room 4

Delivering standardisation and flexibility across your trust

Manage multiple schools and sites

Seamlessly manage account synchronisation with EdTech tools like Microsoft Teams and Google Classroom, and maintain distribution groups across multiple schools with one, centralised configuration.

Scale up consistently

Make onboarding new schools to your MAT a breeze. With the Salamander Integration Suite, you can ensure consistency and standardisation of your systems and processes across your entire trust, with the benefit of flexibility where you need it.

Enhance security

Add another layer of security to your trust. Salamander removes the need to manually keep track of school leavers, which means when a member of staff or student leaves your trust, they no longer have access to their accounts according to your data protection and safeguarding requirements.

Manage multiple schools and sites

- Automated provisioning of user accounts
- Creation and management of Microsoft Teams and Google Classroom
- Timetable synchronisation
- School leaver management
- Microsoft Insights for Education Leaders
- Dedicated MAT support Team
- Movement of Staff across different Schools

> **Salamander saves us time and gives schools the best experience when onboarding new staff and welcoming new students**

The Salamander Difference – Onboarding and Support Journey

Onboarding

Step 1 • Initial Call that we call the KOM! (Kick off meeting)
We'll set up a remote call with you, so that together we can discuss your environment and requirements.

Step 2 • Connectivity and Prerequisite check session
Next, we'll arrange a remote session with you to go through all the checks we need to do to ensure we have exactly what we need to do our thing (CPRC), and that all permissions are minimal to keep everything safe and secure.

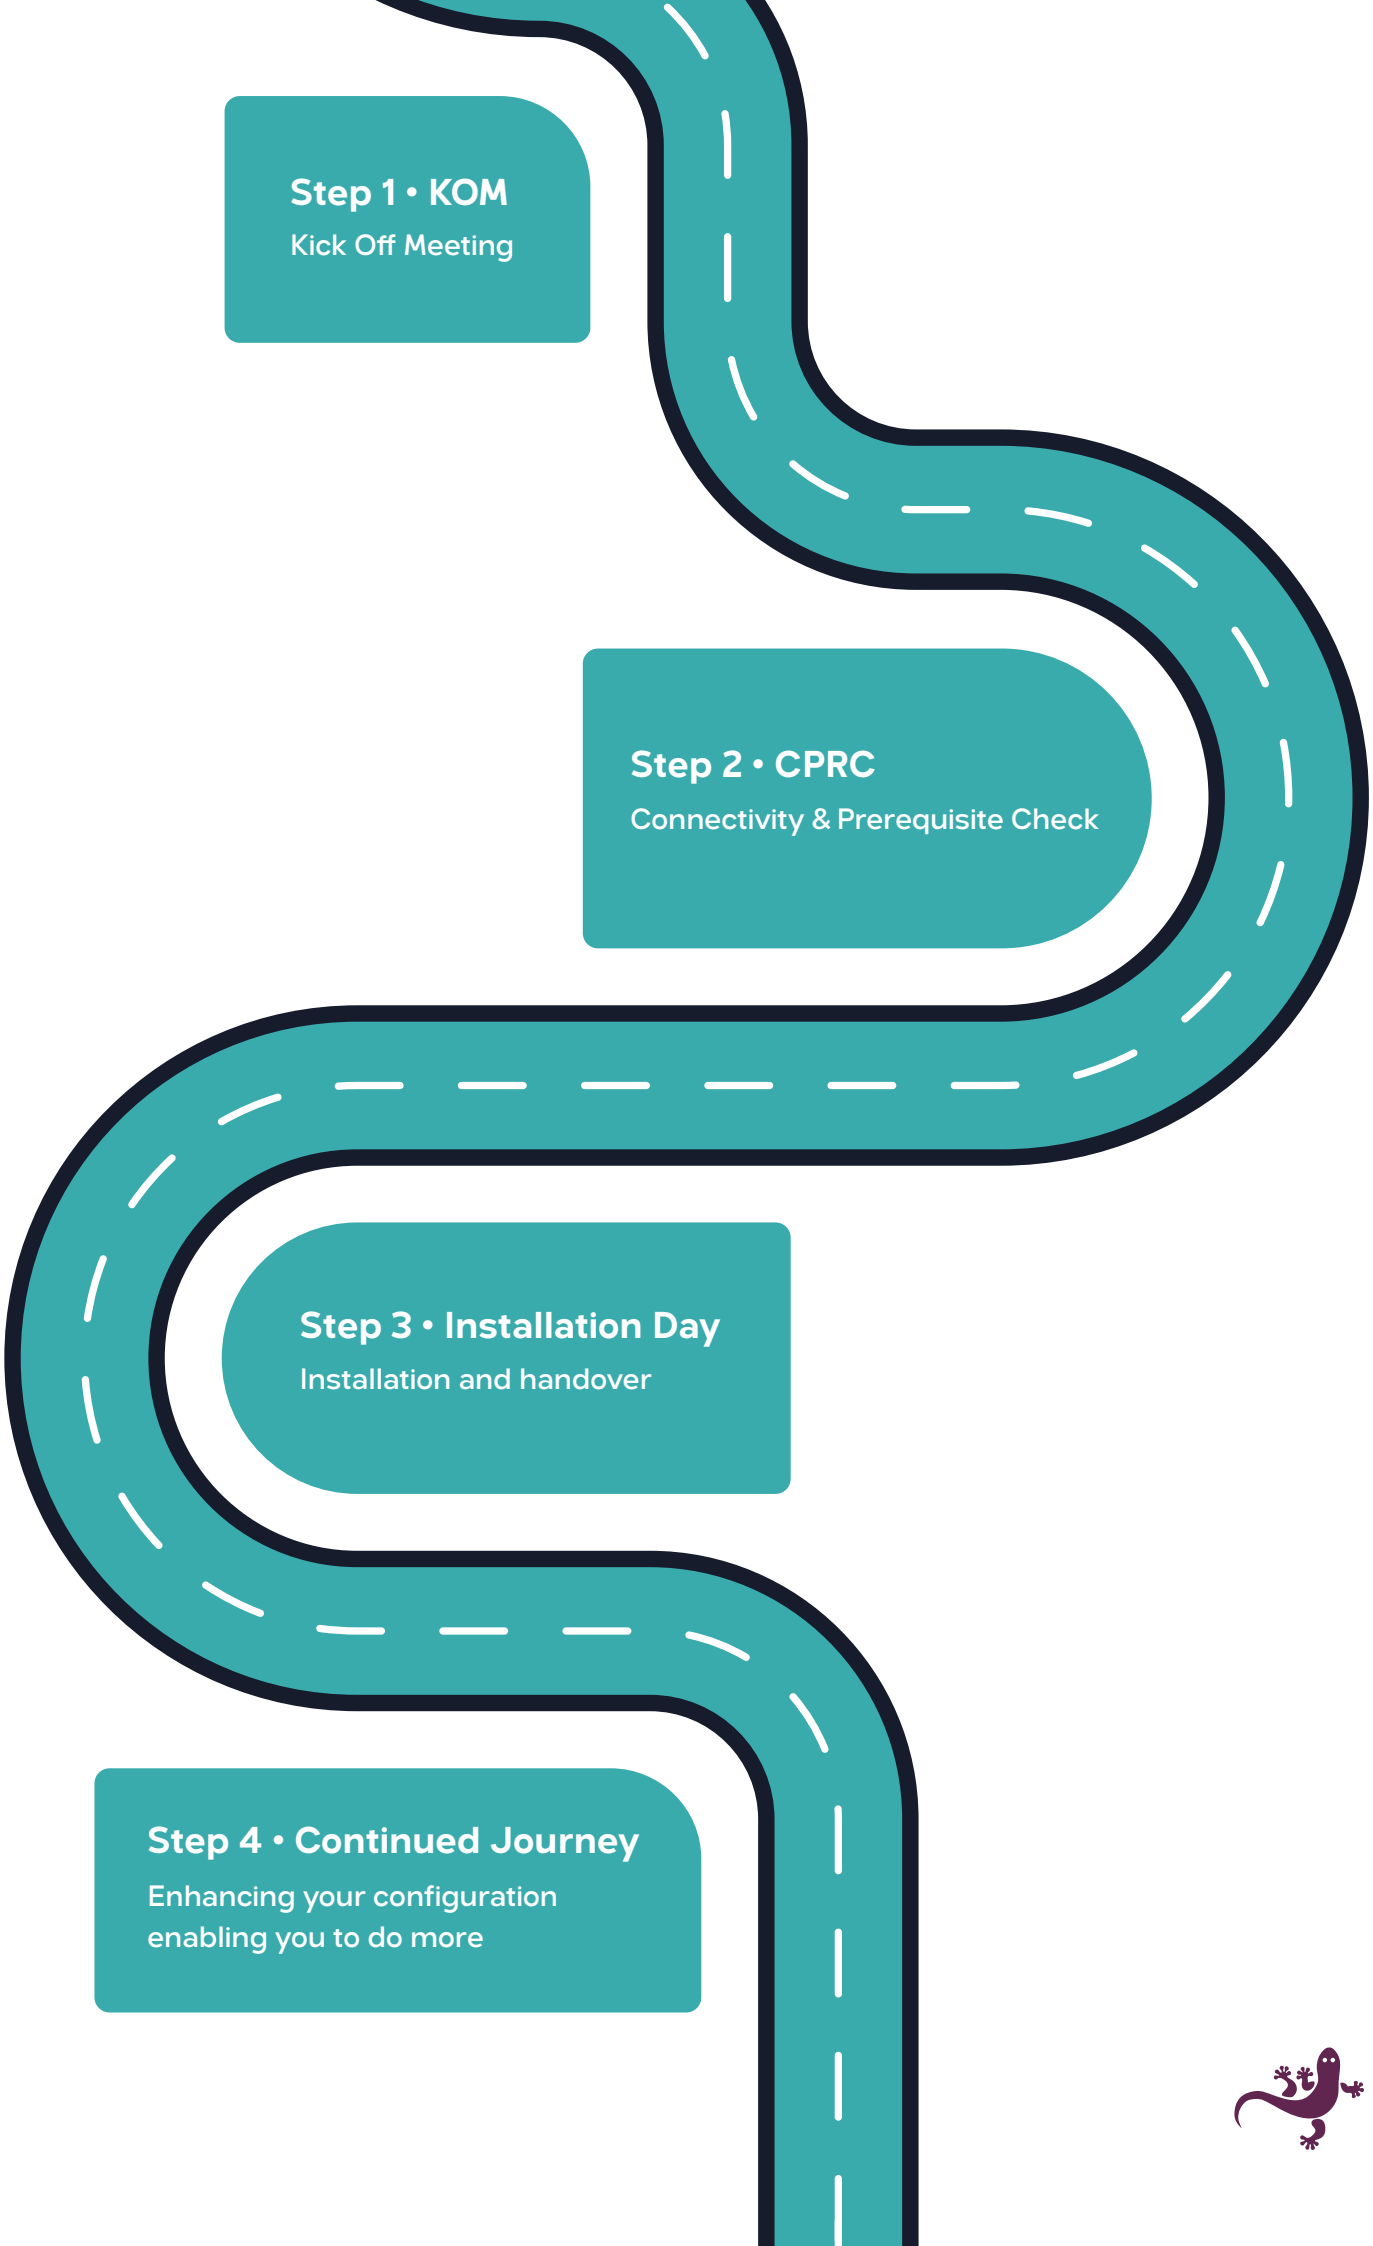
Step 3 • Installation day
You will get to choose when, from a list of available dates, your installation will take place. We will work with you to connect remotely to perform the installation. We'll create test accounts for you to review and match all your existing users. We'll review the installation with you, to ensure all is working as expected before providing an overview document and managing handover to our Support Team before invoicing.

Step 4

Continued Journey

Support Team
You will be assigned to a dedicated team who will be your primary contact during your journey with us. At any time, you can use our Support Portal to raise any questions or change requests. We will then work with you to achieve your objectives.

New Features
As we develop new features for the Salamander Integration Suite, these will be made available via the support portal.



Step 1 • KOM
Kick Off Meeting
Step 2 • CPRC
Connectivity & Prerequisite Check
Step 3 • Installation Day
Installation and handover
Step 4 • Continued Journey
Enhancing your configuration
enabling you to do more
